DEVILBISS®

Sleep

The innovative, stackable DeVilbiss modular sleep line features all the necessary components for building a superior sleep therapy solution. These modular components provide a sleek, small footprint that will satisfy a patient's desire for aesthetics, a doctor's requirement of clinical benefits, and a provider's need for cost savings.

We didn't invent sleep therapy, but with over 115 years of respiratory innovations, we just may have perfected it.

9000 CPAP

This ultra-quiet CPAP features a convenient keypad control; easy-to-read LCD display; 3-20cm H₂O operating pressure range; 0, 10, 20, 30, or 45-minute pressure ramp delay; push-button altitude compensation; while breathing compliance monitoring; and universal power supply. Includes travel bag for transporting 9000 Series CPAP, 9100 Humidifier, 9200 Humidifier Heater, mask and accessories.

Model# 9000D

9001 CPAP

The DeVilbiss 9001 CPAP has all the same great features of the 9000 CPAP, but also offers onboard 3-year compliance memory, automatic altitude compensation, a pressure transducer for auto on-off and greater accuracy, and a 12-volt DC power option. Includes travel bag for transporting 9000 series CPAP, 9100 Humidifier, 9200 Humidifier Heater, mask and accessories.

Model# 9001D

The DeVilbiss CPAP Travel Bag

Perfect for transporting your DeVilbiss sleep therapy products. The bag can easily accommodate a 9000 series CPAP, 9100 Humidifier, 9200 Humidifier Heater, Mask and cushions, hoses, power cables and more. This new travel bag is included with all 9000 series CPAP orders.

Model # 9000D-610

9100 Humidifier

Provides an add-on option for patients who require the comfort of humidity to comply with their CPAP therapy. The 9100 features 12 hours of uninterrupted operation and is compatible with any CPAP. The see-through reservoir permits easy monitoring of water level. The unit separates easily for dishwasher cleaning.

Model# 9100D

9200 Humidifier Heater

Provides an add-on option for patients who require the additional comfort of heated humidity to moisturize the air. The 9200 heater works with the 9100 humidifier and features a larger heating surface for a more efficient and energy-saving unit.

Model# 9200D - 3 prong cord
Model# 9200DI - 2 prong cord

eCompliance, AutoAdjust and Bilevel

eCompliance System

Our innovative system monitors compliance via the Internet and e-mails you when patients don't comply, so there's no guesswork or waiting, just accurate, timely data when you need it 24/7.

Internet IPS Software

Allows your computer to link and communicate with the DeVilbiss eCompliance Server. Internet IPS software is free and installs easily onto an existing Internet-enabled personal computer. Ask your Sunrise Account manager for more information or visit www.sleepcompliance.com.

SMART Track® Modem Module

The improved SMART Track Modem features bi-directional communication allowing for remote parameter changes on the DeVilbiss 9001 CPAP, 9054D RPM AutoAdjust and 9055D RPM-bilevel. This integral part of the eCompliance system connects to a 9000, 9001, RPM AutoAdjust and RPM Bilevel.

Model# SMLINK-300

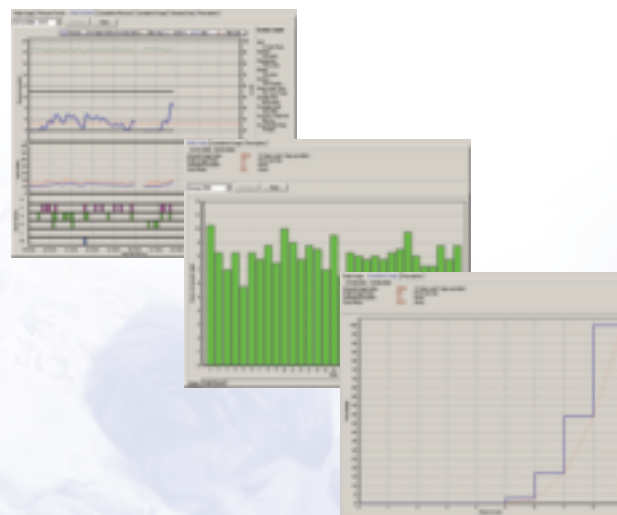

RPM-AutoAdjust®

Adjustable upper and lower pressure limits with adjustable apnea/hypopnea detection algorithm. The patented AutoAdjust detects adverse mask conditions, minimizes airway pressure, is sensitive to snoring, has an adjustable delay setting (up to four hours – split night), and features a self-contained pneumotach and automatic pressure adjustment algorithm.

Optional Pulse Oximetry.

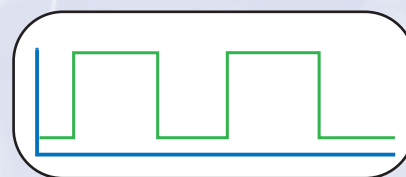

Model# 9054D

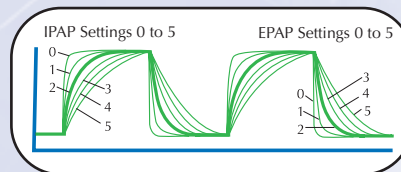

DeVilbiss RPM®-bilevel

All bilevel devices are not created equal. The new RPM bilevel from DeVilbiss empowers your patient's therapy. Not only is the RPM one of the quietest bilevel devices on the market, but it is also one of the smartest. The RPM features a simple method for patients to rate their therapy using the onboard Epworth Sleepiness Scale®. Additionally, the patient has the ability to view a compounded therapy rating -allowing your patients to monitor their therapy. We didn't invent bilevel therapy, but after 115 years of respiratory innovations, we just may have perfected it.

Model# 9055D

Traditional bilevel waveform

DeVilbiss RPM bilevel waveform with selectable IPAP and EPAP Flow Rounding

Masks

DeVilbiss FlexAire™ Mask

We didn't just dream of the perfect nasal CPAP mask, we made it a reality. Introducing the FlexAire mask - a mask that is a fusion of revolutionary ideas, materials and technology. No other mask offers the superior comfort or ease-of-use of this breakthrough interface. We engineered this truly flexible mask with the ability to fit a wide array of facial profiles, to be easy to use for both the patient and clinician, all while being cost effective.

FlexAire Mask #9353D

FlexAire Shallow Mask #9353S

Full Face Mask-7600 Series Vmask™

Manufactured by Hans Rudolph, Inc.

The Full Face-7600 Series Mask is based around a single piece of molded silicone rubber with an anatomically contoured design that creates a soft, stable fit that eliminates painful pressure points caused by many rigid frame masks

7600 Large #113237

7600 Medium #113238

7600 Small #113239

7600 Extra Small #113240

7600 Petite #113241

Sensa Seal VIP76

Manufactured by Hans Rudolph, Inc.

The Sensa Seal is an optional add-on item for the Hans Rudolph Full Face mask. It is designed to help patients who experience leaks around the nose. The Sensa Seal provides an additional sealing flange to help prevent those leaks

Large #669160

Medium #669161

Small #669162

Extra Small #669163

Petite #669164

LYRA Mask with Headgear

Manufactured by Viasys

The LYRA nasal pillows provide maximum patient comfort for those patients who may encounter difficulties with the use of a nasal CPAP mask. The LYRA interface offers patients two position options: over the head and below the chin.

Model #776780

The DeVilbiss SureFit Kit

The DeVilbiss SureFit Kit was designed to improve efficiency and reduce waste when fitting nasal CPAP masks. The kit includes all the necessary components for building a comfortable mask for your patient. The unique modular design of the DeVilbiss Serenity and FlexSet Masks allow you to mix and match forehead pads and cushions. With the SureFit Kit there is no need to throw away a mask if the patient doesn't like it, simply change the components.

Model# 9352D-SK

DeVilbiss FlexSet® Mask

With so many nasal CPAP mask options on the market, it is cost prohibitive to stock all of them. The new DeVilbiss FlexSet mask provides four different cushion options, thus you can minimize the array of masks you stock and build the mask to suit your patient. At DeVilbiss it is our goal to provide you with options that will satisfy your needs as well as the needs of your patients.

FlexSet Mask #9354D

FlexSet Shallow Mask #9354S

FlexSet Gel Mask #9354G

DeVilbiss Serenity® Mask

The Serenity Mask features a silicone cushion, forehead pads and a durable, adjustable frame to help ensure a secure seal and maximum patient comfort. Comes complete with headgear. Available in Standard and Shallow size and Gel.

Standard Model #9352D

Shallow Model #9352S

Gel Cushion Model #9352G

Gel Shallow Cushion Model #9352GS

Also sold without headgear

Model #9352D-621 Standard

Model# 7200D

DEVILBISS iFill™

Personal Oxygen Station

Model# 535D-M6-PD-PKG – iFill with 2 M6 Cylinders with Integrated PD1000A and 1 carry case
 Model# 535D-ML6-PD-PKG – iFill with 2 ML6 Cylinders with Integrated PD1000A and 1 carry case
 Model# PD1000A-M6-2PK – 2 M6 Cylinders with Integrated PD1000A and 1 carry case
 Model# PD1000A-ML6-2PK – 2 ML6 Cylinders with Integrated PD1000A and 1 carry case

The Devilbiss iFill Personal Oxygen Station, Model 535D, represents a breath of fresh air for home oxygen providers who are looking to maintain superior customer service, profitability and their position in the marketplace during changing times.

Features and benefits

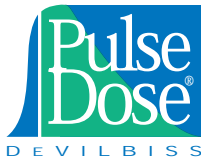

- iFill makes it easy to convert your existing oxygen customers who currently rely on cylinder deliveries. There's no need to replace your customers' existing concentrators.
- The iFill unit extracts purified oxygen from room air using standard oxygen concentrator technology.
- Unlike competitive units, iFill can be used with your existing concentrator fleet.
- iFill makes it easy and convenient for your customers to fill portable oxygen cylinders in their homes to give them greater freedom to come and go as they please.
- iFill provides the flexibility to fill most cylinder sizes including M4, M6, ML6, C, D and E.
- iFill lets users fill their M6 cylinders in just a little over an hour – not the two hours it can take with other in-home oxygen filling systems. Shorter fill times save energy costs.

Intuitive design is easy to use

- Users simply align the cylinder's nipple connector with the fill connector on the unit and click into place.
- Control panel lights illuminate while the cylinder is filling and when the cylinder is full.
- When full, users remove the cylinder by pressing down on the outer ring of the fill connector located under the nipple connector.
- Large outer ring is designed for individuals with limited dexterity, requiring very little pressure to depress.
- The iFill unit can be placed and used virtually anywhere in the home — minimizing the noise and disruption to daily life.
- Partially filled cylinders can be easily topped off.
- Automatically shuts off when filling is complete.
- Includes easy-roll casters that make it easy to move and store the unit when not in use.
- Cylinders can be refilled as often as needed.

Oxygen Conserving Devices

Walkabout™ and Hideaway™ Systems

DeVilbiss PulseDose technology continues to be the gold standard for oxygen conserving devices. Unlike other systems that simply limit the flow of oxygen, PulseDose® delivers a consistent dose of oxygen at the very moment it is most beneficial – on the leading edge of inspiration.

PD4000 PulseDose® Extended Conserving Device

The DeVilbiss PD4000 is easy to set-up, use and maintain. The true 4:1 savings means increased savings for the HME – adding to the profitability of your business. Features an audible alarm, easy to access battery compartment, and a protected contents gauge. Comes with a 3-year warranty and is field-serviceable.

Model#PD4000

PD1000 PulseDose® LT Compact Conserving Device

The DeVilbiss PD1000 features a compact and lightweight design (16.3 oz.). The true 3:1 savings ratio offered by the PD1000 means reduced cylinder deliveries for the HME – making your business more profitable. Comes with a 3-year warranty and is field-serviceable.

Oxygen Concentrators

Safety Features

Not only do DeVilbiss oxygen concentrators lead the industry in reliability and durability, they provide unmatched patient safety. Safety features found on all DeVilbiss oxygen concentrators include:

- Pressure-compensated flow meter that displays accurate flow to the patient
- Pressure-relief valve and thermal protection on the compressor
- Double-insulated unit; two-prong plug
- Flame-retardant cabinet
- High/low pressure alarms
- Power failure alarm

Three-Liter Concentrator

This concentrator features a light-weight, compact design that is easy to transport – only 37 lbs. The DeVilbiss Three-Liter Concentrator features our unique Pressure-Vacuum System, single-solenoid valve with a 10-year warranty and an extended life intake bacteria filter.

Model# 303DS/DZ

Five-Liter Concentrator

The DeVilbiss Five-Liter Concentrator has a simple, reliable and predictable operating system and features a superior rotary valve with 10-year warranty and houses a dual head, low stroke compressor. Increase fleet visibility by using the DeVilbiss SMART Track™ module to help manage your preventative maintenance program on OSD® models.

Model# 515ADS/ADZ

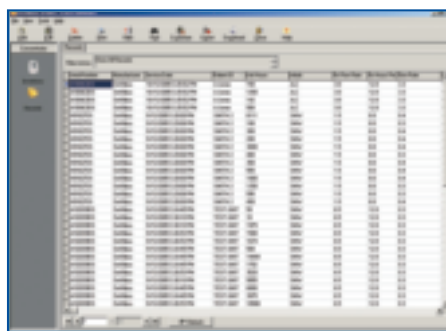

New SMART Track Software

Compatible with all Windows versions, including Windows 2000 and XP.

Input patient data – flow rate, prescription hours, Patient ID.

Manage Download Equipment Information:

- S/N
- Patient ID
- Flow Rate
- O₂ concentration
- Cycle times

SMART Track Module

Connects to all DeVilbiss OSD Oxygen concentrators.

64 records can be stored before download.

Perform in-depth concentrator checks during patient visits in 2/3 the time.
